

KIDCODER: LET'S MAKE A JAM SANDWICH!

DECOMPOSITION

<5MIN

15MIN

STAGE 2

AIM OF ACTIVITY

What do we do when we face a big problem? One thing that can help is breaking the problem down into much smaller, easier problems.

WHAT YOU'LL NEED

- Just a pen and paper to jot down your thoughts!

WHAT YOU'LL GET OUT OF IT

- Understand what it means to use decomposition
- Learn how we can use decomposition when making a jam sandwich!

DECOMPOSITION

Decomposition is part of computational thinking and it can be used to break down one big task into smaller, simpler tasks. In the same way, a wall can be broken down into each individual brick. Here we can use decomposition to break down the task of making a jam sandwich!

KIDCODER: LET'S MAKE A JAM SANDWICH! DECOMPOSITION

WHAT TO DO

(1)

What makes up a jam sandwich? We're going to use decomposition to find out!

(2)

In pairs, write a list of the ingredients that go into a jam sandwich. You can ask your leader if not sure!

(3)

Once you've completed your list, try and think about the importance of each ingredient.

(4)

Would the jam sandwich still be the same without it? Discuss with your partner!

USING IN THE CLASSROOM

In pairs, write a list of the ingredients that make up a jam sandwich and try and rank them in order of importance. At which step for making a jam sandwich is each item used?

TAKE IT FURTHER

Let's try and decompose a drink into its different ingredients! A berry smoothie is a good example.
