

Baking a cake – Algorithms – Stage 1 attachment sheet

The given steps, in the correct order, are listed below:

Start by preheating the oven and lining two cake tins with baking paper.

Weigh the ingredients using weighing scales.

Whisk the butter and sugar together in a mixing bowl, until pale and fluffy.

Whilst you are still whisking, crack in the eggs one at a time.

Add the dry ingredients, including flour, to the mixing bowl.

Stir the mixture until it's smooth and just combined.

Pour the mixture into the two cake tins evenly.

Bake the cakes in the oven until cooked through.

Remove from the oven and allow the cakes to cool down.

To finish, sandwich the cakes and decorate them as you wish!
